## Top 5 reasons; why purchase our PC brand

1. No trialware that normally comes with new PCs, providing a fast and clean operation without the need to hire a service to remove them.
2. No headaches of shipping your PC for warranty service, dramatically reducing the time before you get your computer back. Warranty service with major brands sometimes takes up to 3 weeks or longer. If warranty service is needed, simply bring it to our local shop here in Fountain Hills.
3. No windows setup time that can take hours. The Operating system is pre-installed, setup, updated, and tested. Once you turn your computer on for the first time, you'll go directly to your desktop, ready for you to use.
4. Less likely to need future servicing. Because we built your computer with our 20+ years of experience, we know your computer inside and out, making it less likely to need future service, and if the service is covered under our warranty, it won't cost you anything. Our PC brands are built by our own certified PC technicians with hand picked parts and pre-tested right here in Fountain Hills.
5. Supporting your local economy supports you.
